

"connecting puppies to their forever families"

State of Indiana Rules and Regulations Govern all Warranties and Guarantees

We have done all that is possible to ensure that your new puppy is well socialized and in good health. All of our puppies go to their new home checked by our board certified veterinarian. Who will then issue a current health certificate stating that your puppy has been found to be free from visible signs of infection, as well as any contagious or communicable diseases.

Our One Year Health Guarantee

Your new puppy is guaranteed against any life threatening congenital defects from the time he/she is born to one year of age. If a life - threatening congenital defect is found within that time frame and is verified by our veterinarian, a new puppy of equivalent value will be offered. The original puppy, registration papers as well all veterinarian records must be returned to us. Shipping charges will be the responsibility of the purchaser. In the unfortunate case of death, an autopsy or postpartum diagnosis is necessary. All medical records will need to be sent or faxed to our veterinarian, who will then review the report, and have the final say about the cause of death (congenital or non-congenital).

Responsibilities of the Buyer

As a responsible breeder, we would like to believe that nothing will go wrong with any of our puppies. However, realistically we know things like this are not in our control. It is very important to your new puppy's health that you continue to provide all necessary vaccinations, a healthy diet, regular veterinarian care, adequate living conditions and lots of TLC. We ask that you take your new puppy to a licensed veterinarian within three business days of receiving him/her. Please make sure to keep an accurate record of the veterinarian care he/she receives, failure to provide your puppy with timely inoculations and/or regular veterinary care will unfortunately void our guarantee.

Helpful Note: Please take the health record that we send with you to your puppy's first vet visit as it will be very helpful to your veterinarian.

Exceptions to our Guarantee

A diagnosis of cherry eye, coccidia, giardia, parasites, kennel cough, and or any other type of bacterial/viral infection does not render your puppy unhealthy. These items/germs can be found on the ground, in water and public places. Parvo is also not covered by our guarantee as the puppy has only just begun his/her inoculations prior to going to their new home. Your puppy's immune system is not fully developed until he/she has completed its series of Puppy vaccines. We strongly urge you to take the following precautions.

1. Visits to the vet; never put your puppy on the floor and or ground outside outside of the clinic. Instead, carry him/her or use a pet carrier. Ask the vet staff to disinfect the exam table before you set your new puppy down. This may sound overly cautious, but there are a lot of sick animals that visit the veterinarian everyday.
2. Dog parks, pet shops, puppy preschool and areas where other dogs of unknown health may have visited should be avoided until your new puppy has completed his/her series of puppy vaccines.

Illness/Disease contracted after leaving our premises

All of our puppies are found by our veterinarian to be of good health upon leaving. Veterinarian costs are not covered by this guarantee. Responsible pet ownership requires veterinarian care as well as other puppy expenses. Spaying or neutering costs are not covered, including undescended testes or hernias. Show quality can not be guaranteed, nor can mature size, color, disposition or temperament, markings, confirmation, weight or breeding ability. We reserve the right to refuse the sale of a puppy if it becomes clear to us that it will not be a good match for the puppy. If that determination is made. The buyer's deposit will be refunded. This guarantee is non-transferable. If legal action should occur, It shall be dealt within Elkhart County, Indiana. Out of state laws are not valid. All legal fees will be at the buyers expense
